PASSIVE RECONNAISSANCE

AIM: To learn about the essential tools for passive reconnaissance, such as whois, nslookup, and dig.

TASK 2 :

- You visit the Facebook page of the target company, hoping to get some of their employee names. What kind of reconnaissance activity is this?
  → Passive reconnaissance
- You ping the IP address of the company webserver to check if ICMP traffic is blocked. What kind of reconnaissance activity is this?
  → Active reconnaissance
- You happen to meet the IT administrator of the target company at a party. You try to use social engineering to get more information about their systems and network infrastructure. What kind of reconnaissance activity is this?
  → Active reconnaissance

TASK 3 :

- When was TryHackMe.com registered?
  → 20180705
- What is the registrar of TryHackMe.com?
  → namecheap.com
- Which company is TryHackMe.com is using for name servers?
  → cloudflare.com

TASK 4 :

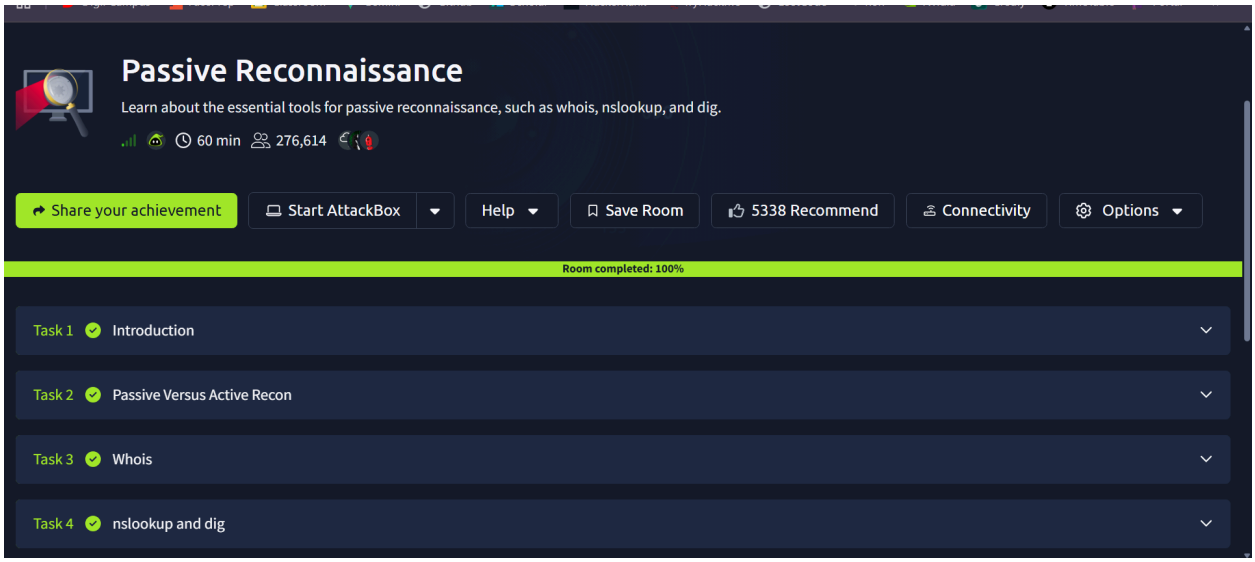

- Check the TXT records of thmlabs.com. What is the flag there?
  → THM{a5b83929888ed36acb0272971e438d78}

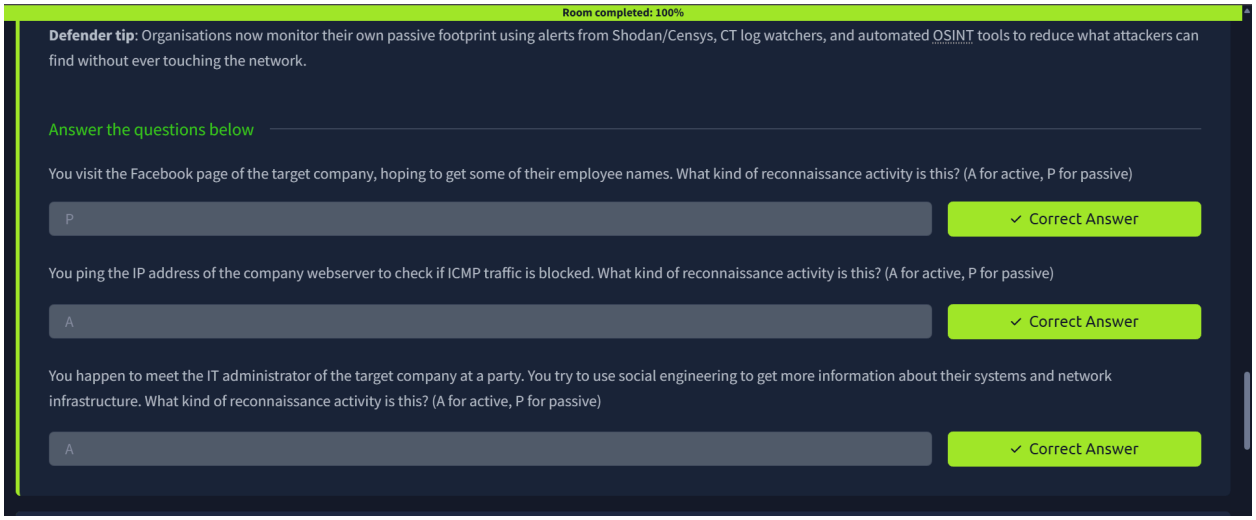

TASK 5 :

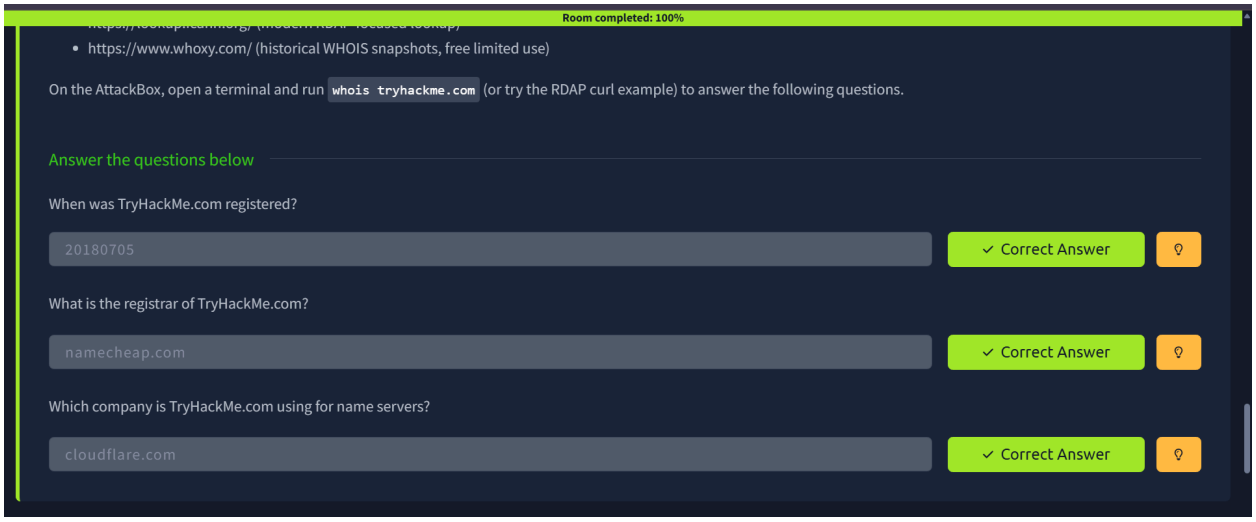

- Lookup tryhackme.com on DNSDumpster. Under **Services / Banners**, which one has the highest count?
  → cloudflare

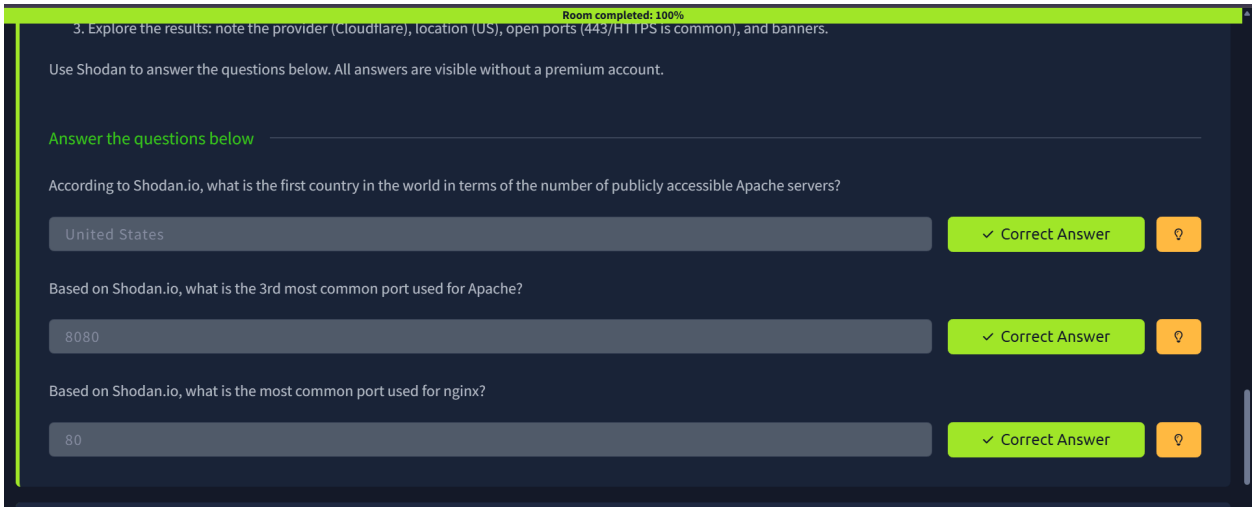

TASK 6 :

- According to Shodan.io, what is the first country in the world in terms of the number of publicly accessible Apache servers?
  → United States
- Based on Shodan.io, what is the 3rd most common port used for Apache?
  → 8080
- Based on Shodan.io, what is the most common port used for nginx?
  → 80

RESULT: Thus the essential tools required for passive reconnaissance have been studied.
